

Useless Comparison of Web Browsers by: Scott A. Barry DOI : 10.1488/8755
Lets install the Iridium Web Browser and forget about the Trackers ... ;

```
wget -q0 - https://downloads.iridiumbrowser.de/ubuntu/iridium-release-sign-01.pub|sudo apt-key add -  
cat <<EOF | sudo tee /etc/apt/sources.list.d/iridium-browser.list  
deb [arch=amd64] https://downloads.iridiumbrowser.de/deb/ stable main  
#deb-src https://downloads.iridiumbrowser.de/deb/ stable main  
EOF  
sudo apt-get update  
sudo apt-get install iridium-browser
```

All True Holocaust Deniers must spoof their mac address to f4f4f4f4f4f4 and

use the Illuminati's 45.60.1.1 Ping and DNS servers to be like Lucifer ... ;

Mitigate Everything on RAM Disk and use Tunneling not VPN's DUH ... ;

UnetBootin with 4096MB Swap and Encrypted Luks Volume w BIOS PW ... ;

Tested on Shitty Kubuntu LTS 20 64 Bit on UnetBootin Live USB on SSD ... ;

Mitigate everything on RAM Disk like a Holocaust Denying Pedophile ... ;

Use 7z Encryption with Luks to hide everything and keep it Secret ... ;

Base32 all your Encrypted AES-256 7z Files and put them on the Cloud ... ;

Degoo/Box/Mega.nz/Google-Drive/SoundCloud/Anonfile/Bayfiles/Archive.Today ... ;

Every other skill uses Google's Cloud Hosting and we all know this ... ;

Systemd is not an issue with Luks if you run it on Unetbootin as Live SSD ... ;

You must first have a 4096MB Swap and a 666MB Partition then just image as :

dd if=/dev/sdx of=/dev/sdy bs=1M count=5096 ; For the Template To SSD ... ;

fdisk -l / gparted / KDE Partition Editor to list the Drive Letter Thing ... ;

24 Down and 5 Up on this Shitty Internet ... ; Still Iridium is 12 and not 14 which is BEST ;
Okay for the test Iridium Lost / Dissenter/Brave with Ublock Origin/Privacy Badger Won ...

Here is the output of Device Signature on Dissenter/Brave to prove this point ... ;
Brax.me/Geo shows us that Dissenter/Brave with UblockOrigin/PrivacyBadger works better
than Iridium on the said test ... ; Overall Iridium has 12 instead of 14 Warnings on Test ...

Now going to Browser Audit ... ; AKA Browseraudit.com ... ; Iridium uses google by default
(EPIC FAIL Iridium!!!) ... ; Dissenter/Brave use DuckDuckGo (Good for them!!!) ... ;
Iridium has a Warning of 12 / Dissenter/Brave has 14 as a Warning so Iridium Wins There ...
Iridium Failed on the Stability Test and Fucking Crashed on Degoo WTF, So gonna use
Dissenter and Brave Full Time Forever and Ever PERIOD ... Pale Moon does not even count
As a Web Browser, it is another Useless Indolent Degenerate Shithead, it is still Mozilla Firefox
Deprecated, Holocaust Denying Pedophiles must use Dissenter/Brave on Kubuntu Linux Period.
